Industrial Microwave Frozen Fruit Quick Thawing Machine

1.Description Of Industrial Microwave Frozen Fruit Quick Thawing Machine

The Industrial microwave fruit food thawing machine is used to thaw fruit or frozen food at -18 degrees. Put the fruit and other materials into the thawing tank filled with water, and stir the water with bubbles, so as to achieve the purpose of the rapid thawing machine. There is a constant temperature pool next to the thawing pool, and the water flows into the thawing machine from the constant temperature pool. With the thawing of the frozen products, the bottom of the water tank is provided with a drain port and a sewage outlet, which can quickly clean the thawing pool and keep the sanitation in the pool without dead ends.

How Do You Thaw Frozen Fruit Without It Being Mushy?

Microwave thawing is to heat the frozen product as a whole, and the temperature rises from the freezing temperature (below -19~-22 C) to a temperature close to the freezing point (about 0~-4 C). Microwave thawing equipment has the characteristics of overall temperature recovery of frozen materials, small temperature gradient of temperature recovery, good temperature uniformity and short time required, and easy control of temperature rise rate. These characteristics make the frozen product thaw to an ideal state.

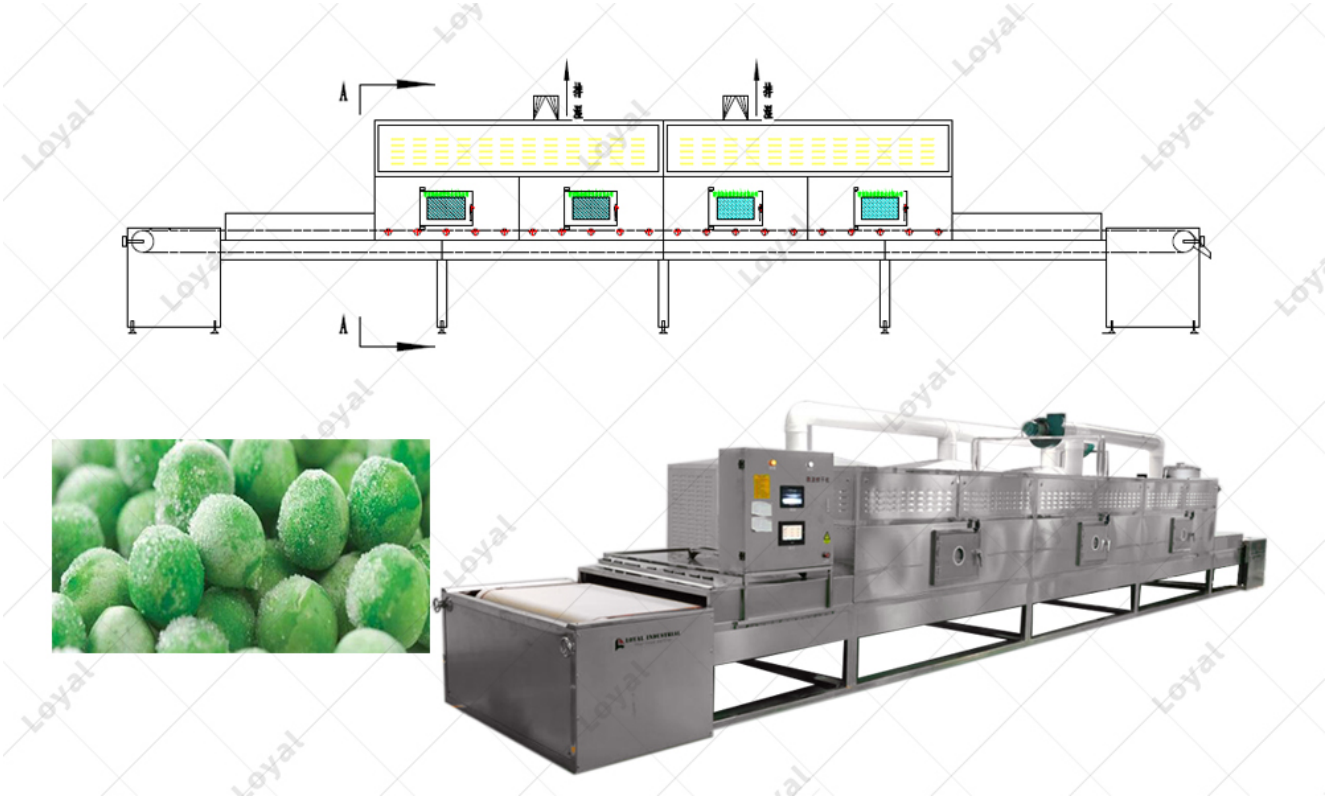
4.Functions & Features Of Industrial Microwave Frozen Fruit Quick Thawing Machine



Why Choose LOYAL Industrial Microwave Fruit Thawer?	
1	The Frozen Fruit Product Can Be Heated And Returned To Temperature As a Whole, Which Reduces The Temperature In homogeneity Between The Thawing Layers Of The Frozen Product, And There Is No Recrystallization Phenomenon Of The Frozen Product When It Is Thawed By The Conventional Method;
2	The Thawing Process Takes a Short Time, And Microorganisms Such As Bacteria Are Not Easy To Reproduce And Grow;
3	Microwave Heating Has No Thermal Inertia. The Temperature Rise Rate Of The Frozen Material Is Controlled By The Microwave Output Power, Or The Microwave Energy Supply Rate, Which Is Synchronized With Each Other.
4	The Final Temperature Of Microwave Thawing Is Generally Selected At -4~ 0ºC. At This Time, The Frozen Fruits Product Can Be Cut With a Knife Without Dripping Water.
